

# Managing Your Inventory is Effortless with eVMI

Jamestown's exclusive Electronic Vendor Managed Inventory (eVMI) system makes replenishing your stock simpler than ever. Get the boxes you need, exactly when you need them, with automatic stock level updates that save you time, space, and cash flow. Discover how easy it is to integrate eVMI into your operation.

## Enhance Your Business's Productivity and Efficiency with eVMI

Jamestown Container's eVMI program is a web-based, just-in-time inventory management solution that greatly enhances your business's productivity and efficiency.

By managing your inventory with eVMI, you can allocate your valuable time to more profitable activities. eVMI quickly adapts to changes in demand, recognizing usage fluctuations and needs immediately. The results? Fewer emergency orders, fewer delayed deliveries, and less damaged or outdated inventory. With eVMI, you can optimize both your warehouse space and cash flow.

## Eliminate Data Entry Errors and Optimize Your Workforce

Our eVMI solution virtually eliminates data errors, freeing up valuable employees to focus on other areas of your business. The customer experience is significantly improved, as stock-outs and expedited orders are drastically reduced. Your inventory is automatically adjusted to meet demand, even in the most unpredictable industries.

## Set Up eVMI in 5 Simple Steps

1. Meet with JCC to determine which items need to be stocked on your floor and/or ours
2. Identify the quantities and decide when you want them replenished
3. Scan the load tag of each unit as it's used
4. Inventory is replenished to maintain required stock levels
5. Easily track on-hand inventory, orders, deliveries, and usage for each item

## Maintaining Inventory is Easy with eVMI

Once it's set up, customers scan barcodes, and packaging stock is automatically replenished as it's used. Key details like minimum and maximum usage levels, buffer sizes, and lead times are predefined. Regular reports are provided, including order status and scheduled deliveries. Since eVMI is an online solution, there's no software to install or hardware to purchase—all you need is a computer with internet access.
