

Managing Your Inventory is as Easy as eVMI

Replenishing your stock has never been easier with Jamestown's exclusive Electronic Vendor Managed Inventory (eVMI) system. Get the boxes you need, exactly when you need them. eVMI updates your stock levels automatically, saving you time, space, and cash flow. Find out how easy it is to introduce eVMI into your operation.

**ELECTRONIC VENDOR
MANAGED INVENTORY**
A JAMESTOWN CONTAINER SOLUTION

Improve the Productivity and Efficiency of Your Business with eVMI

Jamestown Container's eVMI program is a web-based, just-in-time inventory management solution designed to significantly improve the productivity and efficiency of your business.

Managing your inventory with eVMI allows you to prioritize your valuable time in more profitable ways. eVMI adjusts for variances in demand by recognizing usage swings and demand needs immediately. What are the results? Less emergency orders, less delayed deliveries, and less damaged or outdated inventory stocks. eVMI allows you to maximize the use of both your warehouse space and your cash flow.

Eliminate Data Entry Errors and Optimize Your Workforce

With our eVMI solution, data errors are virtually eliminated. This allows you to reallocate valuable

employees to other aspects of your business. The customer experience is greatly enhanced as stock-outs and expediting is drastically reduced. Your inventory will be automatically set to support demand in even the most unpredictable industries.

Set Up eVMI in Just 5 Easy Steps:

Maintaining Inventory is Easy with eVMI.

Once eVMI is set up, customers scan barcodes and their packaging stock is replenished as it's depleted. Specifications like minimum and maximum usage levels, buffer sizes, and lead times are determined in advance. Reports, which include order status and scheduled deliveries, are provided regularly. Because eVMI is an online solution, there is no software to install and no hardware to purchase. The only requirement is a computer with Internet access.

What Others Say About the Ease of eVMI:

"The Vendor Managed Inventory Program has been key for me. It has taken a lot off my plate, clearing up additional space on our warehouse floor and allowing me to focus on our business and other daily tasks."

Patty Olson
Buyer, CardPak

"The flexibility of the eVMI program allows us to limit the floor space we were utilizing simply for storage, and now we have 40 percent more floor space in which we can use for revenue-generating activity."

Ryan Hazlett
Planning & Purchasing Coordinator, Soft-tex

"We feel more of a partnership with Jamestown Container Companies, instead of a vendor relationship. Their eVMI (electronic Vendor Managed Inventory) program is something that we HAVE to have."

Tony Hall
Buyer/Planner, Jain Irrigation

"Jamestown Container Companies' eVMI program is instrumental in streamlining our supply chain."

Erica Wright
VP of Finance, Finger Lakes Extrusion Inc.

"We really love the time Jamestown Container's eVMI system saves with our carton inventory management. We no longer have to physically go to the warehouse to do inventory and the space made available in our facility was much needed."

Douglas Przybyla
Receiving Manager, Alfred Publishing Co., Inc.

"The eVMI program is a fantastic tool. Once you have established your minimum and maximum inventory levels, you are good to go. Just scan your bar codes off the 'skid tags' and you are done. I then can expect a shipment if I have reached my minimum inventory level. It's that easy. It takes all the guess work out of should I order or not!"

Tom Jenior
Traffic Manager, Angstrom Graphics
